

Special Capabilities

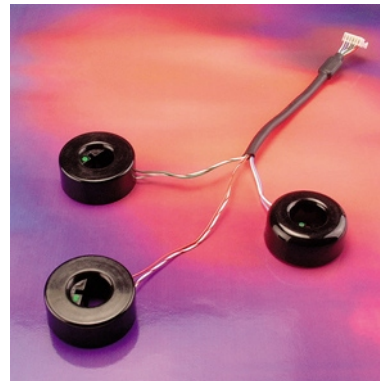

LIGHT DIMMER

- Capability to automatically wind large toroids used in light dimmers for stage lights
- Toroids are mounted onto custom steel chassis

MECHANICAL ASSEMBLY CONNECTOR

- Both automatic and semi-automatic connector crimping
- Wire stripping, tinning and assembly onto cases or devices
- Pull test capabilities
- Continuity testing

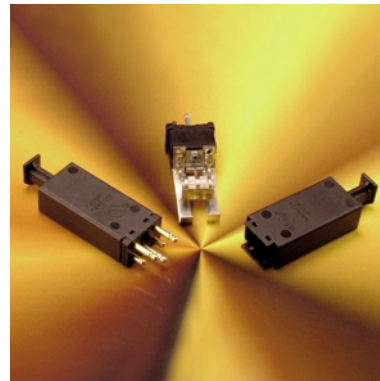

PC BOARD ASSEMBLY

- Value added assembly capabilities for: power supplies, ballasts, chargers, telecommunication splitter cards and in-line filters
- Both through hole insertion and surface mount technology
- Environmental testing capabilities
- In-circuit testing equipment

MECHANICAL ASSEMBLY MODULE

- Molded plastics
- Stamped metal parts
- Screw machined parts both gold and nickel plated
- Ultrasonic welding

OVERMOLDING

- Manufacturing custom components such as solenoids, copper windings and transformers which are encapsulated in plastic using over-molding techniques
- Utilize industry standard recognized plastics

HIGH VOLTAGE TRANSFORMER

- Used mainly in gas and oil igniters
- Winding up to 40 AWG wire
- Vacuum potting
